Minikyou can free up lots of space on your system hard drive by resizing it. It doesn't destroy the data on your hard drive, rather the data is placed on an alternate space. The size of the partition is shrunk by that, you can have extra hard drive space at the same time. This software can split multiple hard drives or partitions, or more than one partition by reallocating the free space to a second partition. This is useful when you have installed an operating system on the hard drive, as you can create an additional partition or hard drive and move the data to that hard drive by shrinking the partition. Minikyou can shrink the partition to a

minimum size, where your operating system is installed. This is ideal for beginners who need a very small partition for their operating system. Free disk space can be used for other application, such as documents, pictures or other operating system. Free disk space is a replacement partition, all data stored on the partition disappears. You can also create a new partition, so you have more space, before installing Minikyou. Free disk space is only for your own benefit, you don't need to remove it. Disk Management: This program can help you manage and increase the size of your hard disk or disks. It can show you all hard disk partitions and their space. You will receive a message whenever the disk partition is full, so you can find out

the disk space status before continuing use of Minikyou. Disk Maintenance: When the disk has room left, you can find temporary information, even if you are working with large documents or databases. You can make multiple backups at the same time, and it doesn't require a lot of space. Minikyou is a piece of software which you will never find anywhere else. Google Drive: This software can be used to upload and download files to Google Drive. You can upload and download files to Google Drive or Gmail account at one place. This will free up your hard disk space. Once you have created a Google account and given permission, you can use this Google drive software to: * Keep a folder and carry all your files, such as pictures, a

resume, documents, and so on. *

Upload files from your local computer or network. * Download files to your local computer or network. Internet Download Manager: You can use this software to download files from different servers such as YouTube, Facebook, and other sites. Internet download
